Scratch Workshop Satisfaction Survey

Workshop Organisation

	🙁	😐	🙂
I think the organisation of the activity has been appropriate.			
Computing resources used to carry out the activity have been appropriate.			
The time length is in line with the fundamental objectives of the activity.			

Development of the Activity

	🙁	😐	🙂
The explanations of the person who led and introduced this workshop were particularly useful.			
The video "Everyone should know how to programme" has been very attractive and instructive for me.			
The examples provided have been interesting and proportioned for your first steps in the world of computer programming.			
The leaflet which describes the activities is well structured and helpful.			
I think this activity has been used to illustrate the concept of *Computational Thinking.*			

Overall Assessment

	🙁	😐	🙂
I think this activity has been helpful and a motivating factor to study computer programming.			
In my opinion the *Computational Thinking* is an indispensable skill in the XXI century.			
I would recommend this experience for to people without any previous knowledge on computer programming.
